Index "A" and "B" Airport Recertification

Six (6) hours of burns in the SAFT. Including specialized rescue training, aircraft familiarization, tactics and strategy topics including approach, fire attack with hand lines, safety and communications. Again the training is scenario based and the times can be adjusted to meet your departments training needs. All training will meet or exceeds Federal Aviation Administration part 139 requirements for your recertification.

Index "C", "D", and "E" Recertification burn

Eight (8) hours of Live Fire Burn Training to meet FAA part 139 requirements including: pit fires - truck and hand line operations; SAFT fires - wheel, engine, interior, cockpit, electrical hazard and cargo. All live fire training is scenario based and can be customized to your needs. Training times can be adjusted to meet your needs assuring all Federal Aviation Administration requirements are met or exceeded.
